## LAKAMBINI INHIYERA 2024

We are thrilled to announce the upcoming 7th Lakambini Inhiyera 2024 summit, an annual event that celebrates the brilliance and achievements of female engineers from various engineering professional organizations (EPO). Last year, the crown was awarded to Miss SMEP Engr IVY Dianne M Buncag, a talented Metallurgical Engineer.

As we eagerly anticipate this year's event, the question on everyone's mind is: Who will be crowned Lakambini Inhiyera? Will SMEP retain the crown, or will it be passed on to another remarkable organization such as GEP, IECEP, IIEE, PSBAE, SAEP or PSME? The competition is fierce, and we encourage you all to watch closely as these brilliant women showcase their skills, knowledge, and passion for engineering.

The Lakambini Inhiyera 2024 is not just a platform for recognition; it is an opportunity to inspire and empower aspiring female engineers. It serves as a reminder that gender should never be a barrier in pursuing one's dreams and making a significant impact in the engineering field.

So mark your calendars and join us in celebrating the ingenuity and determination of these exceptional women at the 7th Lakambini Inhiyera 2024! Together, let us support and applaud the future crown holder, who will undoubtedly leave a lasting legacy in the world of engineering.

BATAK TRIBE VILLAGE

*They are located in the Northwester Portion of Palawan, a relatively large island in the southeast of the archipelago. Since ancient time, the Batak have inhabited a series of rivers valleys along the coastline of what is today PUERTO PRINCESA CITY*

CSR activities that we can do at Batak Tribe for Women

1. **\*STEM Workshops\***: Organize hands-on science, technology, engineering, and mathematics (STEM) workshops specifically tailored for women and girls in the village. These workshops can cover topics such as basic engineering principles, robotics, coding, and sustainable technology.
2. **\*Solar Power Project\***: Collaborate with engineers and solar power experts to implement a solar power project in the village, providing training for women to install and maintain solar panels. This initiative can help increase access to clean energy and create economic opportunities for women in the community.
